Education

Baderia Global Institute Of Engineering And Management

2021 – 2025

Bachelor of Technology in Electrical and Electronics | CGPA: 7.40

Jabalpur, Madhya Pradesh, India

Higher Secondary (HSC)

2021

B.S.S Girl's High Secondary School | Percentage: 76.8%

Jabalpur, Madhya Pradesh, India

Secondary (SSC)

2019

B.S.S Girl's High Secondary School | Percentage: 74%

Jabalpur, Madhya Pradesh, India

Relevant Coursework

- Data Structures & Algorithms
- Object-Oriented Programming
- Embedded Systems
- Digital Electronics
- DBMS
- Operating Systems & Networks
- Internet of Things (IoT)
- Computer Architecture

Experience

Embedded Systems Engineer Intern

AIMS Interactive Pvt Ltd

Jabalpur, Madhya Pradesh

Duration: June 2025 – Present

- Designed and optimized embedded software solutions for real-time monitoring and automation systems, improving overall system efficiency by 30% through performance optimization, reliable data processing, and enhanced communication control modules.
- Contributed to firmware validation, system calibration, and hardware-software integration, reducing response delays by 25% and improving system stability across multiple embedded applications.
- Collaborated within an agile engineering environment to support rapid prototype development, troubleshooting, and deployment of reliable industrial automation and embedded technology solutions.

Projects

• IoT Sensor Data Visualization Dashboard | C++, MATLAB

February 2026

Created a graphical interface for real-time monitoring and analysis of sensor data, applying object-oriented principles to improve data processing speed by 25% and rendering efficiency by 30%.

• Real-Time Weather Monitoring Web App | HTML, CSS, JS, C++, API

August 2025

Developed a responsive full-stack web application to display real-time weather analytics. Integrated frontend dashboards with microcontroller backends via RESTful APIs, enhancing user accessibility.

• Dual Axis Solar Tracker System using Arduino/ESP32 | C++, Hardware

April 2025

Designed and programmed a hardware-centric solar tracking system using LDR sensors and servo motors, increasing solar energy collection efficiency by 35% compared to static panels.

• Battery Management System (BMS) Modeling | MATLAB, Simulink

January 2024

Designed and simulated battery charging, discharging, SOC estimation, and thermal monitoring for EV applications, keeping simulated battery cell temperatures within safe operating limits under a high-current 2C discharge cycle.

Courses

Embedded Software Development with C (Specialization)

June 2026

Coursera (EDUCBA)

Embedded Systems on Arm: Get Practical with Hardware

June 2026

Coursera (Arm)

Mastering PCB Design and Layout (Specialization)

June 2026

Coursera

PCB/CAD Design – Signal Routing

June 2026

Coursera

Simulink Onramp

May 2026

MathWorks

MATLAB Onramp

April 2026

MathWorks

Technical Skills

Software & Languages: C/C++, SQL, OOPS

Web Technologies: Full-Stack Web Development, WordPress, HTML/CSS, JavaScript, REST APIs

Hardware & Embedded: Microcontrollers (Arduino/ESP32), PCB Design, Digital Electronics, Sensors

Tools & Technologies: Git/GitHub, VS Code, MATLAB, Simulink, Proteus, KiCad

Soft Skills: Team Collaboration, Problem Solving, Analytical Thinking, Technical Communication

Achievements & Extracurricular Activities

- Awarded NCC “C” Certificate with the rank of Under Officer in National Cadet Corps.
