Sejal Sahu

has successfully completed the online Specialization

Mastering PCB Design and Layout

Earned the Mastering PCB Design & Layout Certificate by completing 3 courses in professional PCB development. Demonstrated proficiency in PCB layout fundamentals including design rules, component placement, & layer stackup. Mastered high-speed signal routing with controlled impedance, differential pairs, & EMI mitigation. Applied Design for Manufacturability & Design for Testability principles to create production-ready boards. Completed hands-on projects including USB-to-UART converters & microcontroller development boards using KiCAD. Developed expertise in power/ground network design, thermal management, & fabrication file generation. Prepared to design reliable, manufacturable PCBs for prototypes & mass production in embedded systems, IoT devices, & hardware development roles.

Industry

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
